

Unit 2, Moate Road, Kilbeggan, Co. Westmeath

Phone: 057 9333378

At RMIS Engineering we specialise in Mechanical Engineering Contracting and Fabrication works to serve a wide range of industries in Carbon/Mild steel, stainless steel and Aluminium fabrication, pipework, welding and the provision of integrated engineering solutions. We will design, manufacture and install on site, virtually all types of secondary fabrications in mild steel, stainless steel and aluminium. Our strength lies in our ability to deliver the highest standards of QHSE required in highly regulated industry sectors including oil and gas. We have a wealth of experience in providing a complete turnkey solution which can streamline demanding engineering projects for our clients, overseeing projects from start to finish with the services of a dedicated highly skilled workforce. Our work is produced by skilled, time-served tradesmen including coded welders, platers and mechanical fitters. Our tradesmen are equally capable of operating from our fully-equipped fabrication workshop or on-site at client premises. Our management team has backgrounds in fabrication, mechanical engineering and customer service delivery. With our midlands location and engineering heritage, our skills enable us to offer a high quality engineering service and an adaptable team. We have been providing a first class service to industry for many years. We operate from our fabrication workshop in the town of Kilbeggan, County Westmeath in the centre of Ireland.
