Kilkenny Limestone are experts in the extraction, manufacture and supply of Irish Blue Limestone, and proudly serve in the construction of prestige edifices worldwide. Irish Blue Limestone, one of Ireland's most precious resources, has been treasured and used for centuries. This charismatic and multi-faceted stone has many destinies, from the centre-pieces of contemporary home design to the principal theme of architectural projects around the world. It is our pleasure to introduce our extensive range of Irish Blue Limestone products in distinctive Classic Blue, Dark Selection and Fossil varieties, individually rendered in a number of high-precision quality finishes. Various shade and finish combinations tease the stone into its many expressions of colour and texture, as it courts the light and develops in complexity with time.
