Designing and Manufacturing Computerised Control Systems for over 30 years. We have approved system house status for many leading controls companies such as Trend, Cylon and Tridium. Our product range includes: Motor Control Centre (MCC) manufacture, Form 2 and Form 4 Cylon, Trend and Tridium based Building Management Systems (BMS)

Our service range includes: Comprehensive

Maintenance Calibration Validation Bespoke Design Energy Monitoring &

Targeting With an installed base of some 5,000 controllers, there are very few complex energy management systems Manutec have not successfully completed. A BMS system allows the many and varied control elements within a building to become integrated together sharing information as needed. This allows the owners and occupiers to have complete flexible control across all elements of the building.
